

Surefire EB1 Backup

Product Code: EB1CABK
Availability: In Stock

Price: \$167.79

Description

The Backup dual-output LED light features a brilliant 200-lumen beam ideal for identifying threats and overwhelming the sight of adversaries, or a low output 5-lumen beam perfect for reading a map, checking an ID, or navigating in low light. The TIR lens produces a tight beam with enough surround light for peripheral vision, and the coated, tempered lens resists impact and maximizes light with minimal degradation to your dark-adapted vision. The Backup can run for 1.3 hours at high output and 40 hours at low output, a valuable feature for outdoor or emergency situations. A tough, lightweight Mil-Spec hard-anodized aluminum body protects the Backup's sophisticated electronics, and its smooth contours minimize clothing snag and pressure points. A two-way clip allows head-up or head-down carry. Available in black with a tactical pushbutton and twist operation.

Specification

Firearms	
Type:	Tactical Light
Accessories	
Battery	1 CR123A Lithium 3v
Bulb Type	1 LED
Candle Power	200 Lumens
Color	Black
Diameter	1.1in
Material	Aluminum
Waterproof	Weatherproof
